

Frankensteins' Bloody Nightmare (2007)

- written July 2007

Summary: Victor Karlstein is in love and the girl he cares for ends up dying in his family-run hospital. However not to fear as he has a monster available to find parts to reanimate his love. However these victims are not about to go down quietly.

Overall: I've got a few opinions of this film with the bottom line being: go watch this film. I'm not normally a big fan of "experimental" cinema and so watching this...it's not my "cup of tea." But let me add...I've seen some films where their creators looked they had no idea what they were doing. That's not the case here. Mr. Hand knows how to do his job. He's really good at the cinematography, lighting, editing, etc. Although I may not normally be a fan of these films, don't mistake that for the fact he really made a good film. And did a good job on it. And no reason you shouldn't get yourself a copy either!! Be prepared for something other than the "cookie-cutter" slasher films. This is new, different and frankly, gonna blow your mind. So go for it!

Comparison: Mary Shelley's Frankenstein meets Severed Head Network
